TO WHOM IT MAY CONCERN:

Besides being an Attorney at Law, I am Trustee for numerous individuals that require from time to time assistance in taking care of themselves. I make arrangements with various home health care providers based upon the respective needs of my clients.

Over the past two years plus, I have utilized the services of Victoria's Tender Care and members of her staff.

Some of my clients have alzheimers and others have parkinsons and others simply need assistance in their day to day living by taking my clients to the doctors when needed, to the grocery store, to run errands, to clean their house, to help them with getting dressed and making sure they take their proper medications when they are supposed to, to cook their meals, and to do all other reasonable requests that a given client may need from time to time. A lot of my clients require some health care provider to be with them on a 24 hour basis on a 7 day a week basis.

As stated earlier, I have used Victoria's Tender Care. I am happy to report that in all cases where I have utilized their services that both Victoria, herself, and her various staff members that she has working for her have always been extremely courteous and have always met all the needs of my clients. I am further impressed by the fact that various health care providers call me on the telephone from time to time to relate to me the physical and mental condition of my clients, and based on this information I make decisions as to whether my client needs to see a doctor or physician, and further, I make decisions as to what additional care is needed for each respective client. This information furnished to me by the care givers of Victoria's Tender Care, is very helpful and enlightening, and I have dealt with other health care agencies that I do not receive such periodic reports. What I am simply trying to say is that Victoria's Tender Care and her staff take the extra step, so to speak, to ensure that the client/patient's needs are well cared for and that a proper party is notified as to any additional care that may be required or needed through the observation of the care giver.

I currently have care givers through Victoria's Tender Care taking care of my existing clients. I am extremely satisfied with the
